CAREER OBJECTIVE

Full Stack Developer with 3+ years of experience building scalable web applications using React, Next.js, Node.js, and MongoDB. Skilled in developing high-performance systems, optimizing frontend and backend workflows, and delivering production-ready solutions with a focus on clean architecture, performance, and user-centric design.

KEY COMPETENCIES

Language: JavaScript, Typescript
Frontend: React.js, Next.js, Redux, Tailwind, Bootstrap, SCSS
Backend: Node.js, Express.js, Socket.IO, JWT
Database: MongoDB, PostgreSQL - Basic
Tools: Git, REST APIs, Performance Optimization
Testing: Unit, Integration, and End-to-End (Jest, React Testing Library, Cypress - Basic)

PROFESSIONAL EXPERIENCE

Software Developer (MERN) **Feb 2025 - Present**
Mojaru Education Technologies Ltd, Panthapath, Dhaka 1205

- Fullstack development of Mojaru ERP with React, Next.js, Node.js, and MongoDB.
- Built modules for transactions, courier, and course-batch dropout system with role-based workflows.
- Leading migration from React.js to Next.js for improved performance and scalability.
- Managing state with Redux Toolkit and optimizing API integration for seamless UX.

Frontend Developer **June 2024 - Feb 2025**
Bazar365, Gulshan-1, Dhaka 1212

- Developed responsive and high-performance web applications using Next.js, TypeScript, and Redux.
- Designed and implemented reusable UI components with Chakra UI and Tailwind CSS.
- Created complex state management solutions and integrated API to ensure seamless data flow.
- Improved performance, cutting load times by 20% with caching and lazy loading.

Junior Frontend Developer **Sep 2023 - Feb 2024**
Dream-IT, Kurigram

- Played a key role in developing a successful Hotel Management Solution.
- Contributed to building a Construction Solution from scratch.
- Formed and led a new development team, ensuring smooth collaboration and delivery.

KEY ACHIEVEMENTS & SELECTED PROJECTS

- Built an automated lead collection & distribution system, improving efficiency and reducing manual effort.
- Designed and implemented a scalable courier management system with optimized workflows.
- Built a scalable bulk email & SMS system supporting concurrent processing, handling 10k+ messages/day
- Implemented full SEO optimization (SSR, sitemap, metadata), improving search visibility.
- Improved frontend performance by ~20% using caching, code splitting, and lazy loading.
